

Murtaja Adnan

Experienced Self-Taught Software Developer. With three of experience, I have developed a wide range of projects using various technologies and languages. My expertise includes web and mobile application development, particularly with modern technologies like React.js and Flutter. Notably, working with two Odoo gold partners, I acquired significant proficiency in Odoo.

Technologies: Odoo, Django, Django Rest Framework, React.js, Vue.js, Jest, Redux.js, Flutter, Material UI, Bootstrap, Git, Github, Postgresql, Firebase, CI/CD.

WORK EXPERIENCE

Odoo Developer, Advicts, remote 02 2023— present

- + Customized Odoo Modules and Automation: Developed and participated in developing tailored solutions for a range of Odoo models, such as accounting, inventory, sales, HR, and more. Additionally, automated Odoo's processes, improving efficiency and optimizing operations.
- + Custom Appraisal Module: Developed and deployed a tailored performance appraisal module that precisely met the requirements of the company.

Web Developer, Integrated Path, on-site: My current position. 07 2021— 01 2023

- + Utilizing modern technologies, I have developed enterprise-level web and mobile applications.
- + I have developed and participated in the development of various Odoo modules.
- + Using JavaScript, React.js, Material UI, Redux, Python, and Django Rest Framework I developed an attendance management web application which is called Seat Score. It's for managers to monitor the employees' attendance. It includes a statistics dashboard, employees, attendance, change requests, time off requests, a map of the work location, a weekly calendar, and devices pages. For more info visit this [link](#).
- + Using Flutter I participated in the development of Seat Score Mobile Application.
- + Using Flutter I developed a mobile application called Reeh which is a cross-platform app. It's a delivery app for two kinds of customers. One is the vendor and the other is the courier. The app includes dashboards for both users that show all the statistics and available deliveries with different screens. And is currently available on [AppStore](#) and [GooglePlay](#).

Front-end Web Developer, Aadae startup, remote 04 2021— 06 2021

- + Developed clean, maintainable, and reusable code. Use Accomplished high performance and user-friendly performance measured by experienced developers and designers using React.js framework Material UI.

TECHNICAL PROJECTS

Find Yours [CODE](#) | [DEMO](#)

Find Yours is a web app that helps people find their lost items.

- + Environment: HTML, CSS, JavaScript, React.js, Material UI, Firebase.
- + As the final project for my Iraq React Bootcamp, I learned how to utilize Agile Methodology in software development best and work with a lead engineer and junior developers.

EDUCATION

Re:Coded & Flatiron School, Online Bootcamp 02 2021— 05 2021

- + Front End Web Development (HTML/CSS, JavaScript, React)
- + 3 months of intensive project-based learning + immersive coding, with a simulated client project

CS50W online course 6 2020 — 10 2020

- + Web Programming with Python and JavaScript including six projects.

Institution, Baghdad, Iraq 2019 — 2020

Diploma Degree in Electricity Oil Equipment / Electrician.

LANGUAGES: English(Full Professional Proficiency), Arabic(Native)
